IFE ODUGBESAN

FULL STACK WEB DEVELOPER

An experienced (6+ years) self employed Ruby on Rails full stack web developer with a passion for crafting robust, user-friendly applications. Proficient in creating/translating designs into fully functional web apps. I'm also a teaching assistant at Le Wagon (coding bootcamp) which allows me to guide students on their RoR journey.

LE WAGON

An intensive full stack web development course at the world's #1 coding bootcamp. Here I was taught the concepts and practice of **Ruby**, **Ruby on Rails**, **HTML**, **CSS**, **Design using Figma**, **Javascript**, **Stimulus, Ajax**, **SQL**, **PostgreSQL, Git**, **Github** and **Heroku**. Following completion, I went on to become a teaching assistant on the course which has lead on to me being hired by various alumni to build their MVP's.

PROJECTS I'VE BUILT/WORKED ON FOR CLIENTS

(These projects can be viewed at https://www.ifeodugbesan.dev)

WATER ACCESS RWANDA TRACKER - BUILT AND DESIGNED 100%

Transforming WAR's capabilities of tracking maintenance of water systems and equipment. We created a tasks scheduling platform which was previously tracked manually in excel. This has simplified daily business and has freed up resources for business growth. I was tasked with building the whole application.

LAWFAIRY - WORKED ON AND DESIGNED (FRONT END)

A groundbreaking engine capable of generating virtually any legal documents, regardless of complexity, in mere seconds. I worked on the design and front end of this platform.

FOENIX CODING - BUILT 100%

Foenix Coding is a leading manufacturer and global supplier of the latest ink jet printers to the food, beverage, pharmaceutical, industrial and electronics industries for in line product coding, marking, (printing) and identification. I built the whole application.

CODEBREAKERS - BUILT AND DESIGNED 80% (FULL STACK)

Complete coding challenges to level up your coding knowledge & win prizes! Suitable for beginners. I was tasked with building the design and implementation of the front end. Also creating and implementing the quiz.

LOOP BEAUTY - WORKED ON (FRONT END)

Loop Beauty make cosmetic selections for women of colour by sorting through thousands of beauty products along with tutorials, cookbooks and recommendations from their expert network of influencers. I was tasked with building 100% of the front end on this platform.

SKILLS

- Ruby
- Ruby on Rails
- HTML
- CSS/SCSS
- Javascript
- Stimulus
- Figma
